

Collaborative Curriculum Development for High School Students' AI Literacy

Workshop Hosted by the UT-Austin iSchool's IMLS LADDER Project Team

Friday, April 21, 2023

9:30 am - 11 am

Room 615AB at Hilton Austin

About the Workshop

Join us for a workshop where we'll be delving into the crucial topic of AI literacy.

Together, we'll be designing an educational program for high school students to help them learn about the future of AI and its impact on their lives and careers. Topics include algorithmic bias, generative AI, disinformation, and self-driving cars.

School librarians attending the TLA 2023 Conference are invited to join us for an exciting and enriching experience!

About the IMLS LADDER Project

This workshop is funded through a grant from the Institute of Museum and Library Services for our project, "Training Future Faculty in Library, AI, and Data Driven Education and Research (LADDER)." The goal of this project is to prepare future LIS faculty who have hybrid expertise in leveraging libraries and AI and data science to benefit libraries.

LADDER Fellows conduct collaborative research with school, academic, and public librarians as well as the principal investigators, Soo Young Rieh, Ken Fleischmann, and David Lankes.
